1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US05/03166

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US05/03166

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-35</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-35</u>	NO
Industrial applicability (IA)	Claims <u>1-35</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-35 lack an inventive step under PCT Article 33(3) as being obvious over Korhammer et al. in view of Pourhamid.

Re claims 1, 8-9, 11-12, and 28-30, Korhammer teaches a system for routing a trading center (para. 0001), comprising:
a memory operable to store policy information, cost information, and rebate information associated with a plurality of market center (figs. 3 and 5);
a processor coupled to the memory and operable to (figs. 5-6):
receive a plurality of market center prices for the trading order (fig. 8b);
receive best price information for the trading product (para. 0003);
adjust at least one market center price according to the policy information of the corresponding market center and the best price information (para. 0004);
adjust at least one market center price according to at least one of the cost information corresponding market center (figs. 10-11);
compare the plurality of market center prices (para. 0019); and
select a particular market center based at least in part upon the comparison (para. 0052). However, Korhammer does not explicitly teach rebate information. On the other hand, Pourhamid discloses rebate information (para. 0002 and 0043; figs. 1 and 3). He discloses credit coupons for stocks on the issuing company. These credit coupons will convert into valuable stocks. These credit coupons are valuable rebate information to later on be converted into stocks. Thus, it would have been obvious to one of ordinary skill in the art to include rebate information as a credit coupons as discloses in McDonald.

Re claims 2 and 19-20, Korhammer teaches trading order specifies at least one of a bid request and an offer request for the trading product, the trading order further specifying a quantity for the trading product (para. 0037).

Re claims 3 and 21, Korhammer teaches a financial instrument (para. 0018).

Re claims 4 and 22, Korhammer teaches processor is further operable to route the trading order to the selected market center (para. 0034).

Re claims 5, 7, 10, 13-18, 23-26, 32, and 34, Korhammer teaches each market center price comprises at least one of a bid price and an offer price for the trading product (para. 0052).

Re claims 6, 27, 31, 33, and 35, Korhammer teaches policy information indicates whether a particular market center will match, split, or disregard the best price information (para. 0054).
